- Main menu
  - you can scroll through different menus, tap on a submenu section to reach it
  - most important info is displayed (e.g. project progress of highest priority project, next calendar entry …)
  - different tools like a metronome, audio recording and replay are accessed from here

- Project Folder
  - you can scroll through all your active projects and their progress or search a name
  - tap project to acces it
  - click on previous projects to find archived projects
  - click on add project to add a new one
  - click on shared projects to find projects you shared or that were shared with you
    - from shared projects you can accept projects that someone proposed to you and accept changes they made on shared projects (missing drawing of menu)
  - drag and drop to change priority (top on has highest priority)
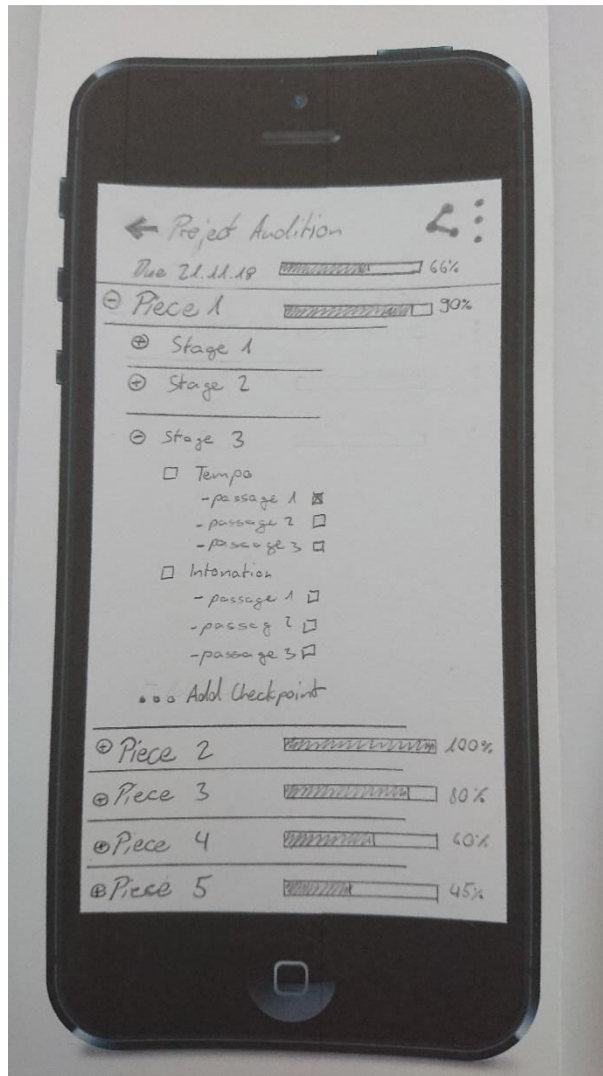

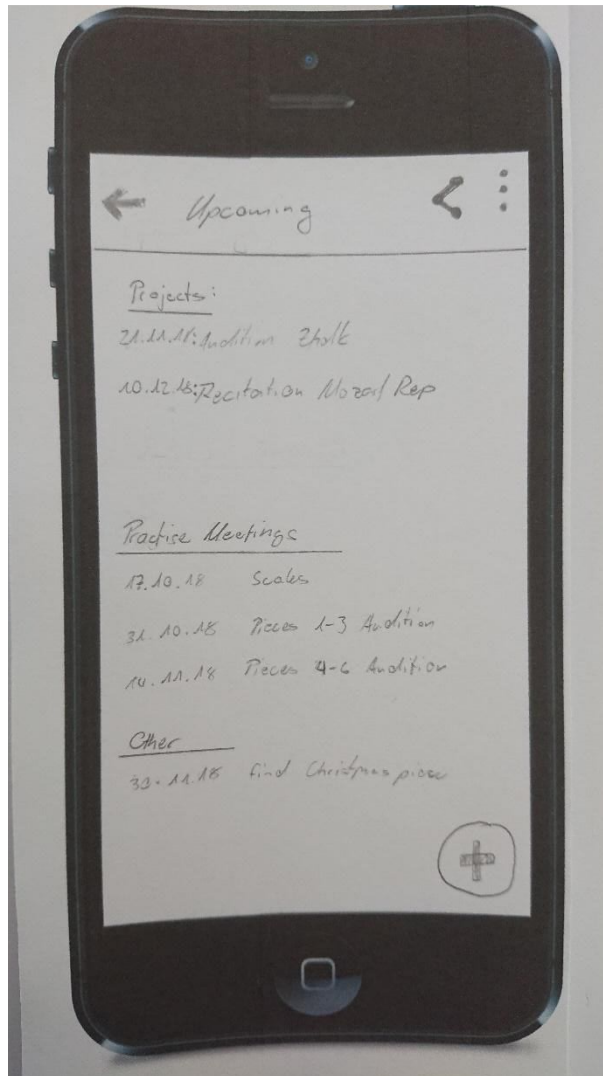

- Project menu
  - See the progress on the selected project
  - expand each piece to see progress on different stages
  - in each stage different you can access issues you are working on
  - check them if you have finished or add new ones, you can also accept checkpoints someone proposed to you
   -

- Add new project
  - add name and due date
  - add pieces and checklists to see what you want to work on

- Calendar
  - this menu can be coupled with your phone calendar
  - new projects are added automatically
 - you can add dates with categories to order them

- Practice menu
  - You can see your current/upcoming practice session
  - you can modify or check if you have finished a checkpoint
    - tap a checkpoint to check it, swipe right to remove a checkpoint,
  - if you finish the entire list the session finishes automatically or you can click finish session
  - you can access previous sessions at the bottom left
  - to see shared sessions click bottom right
  - if necessary one can show the tools like in the main menu in the bottom for quick access
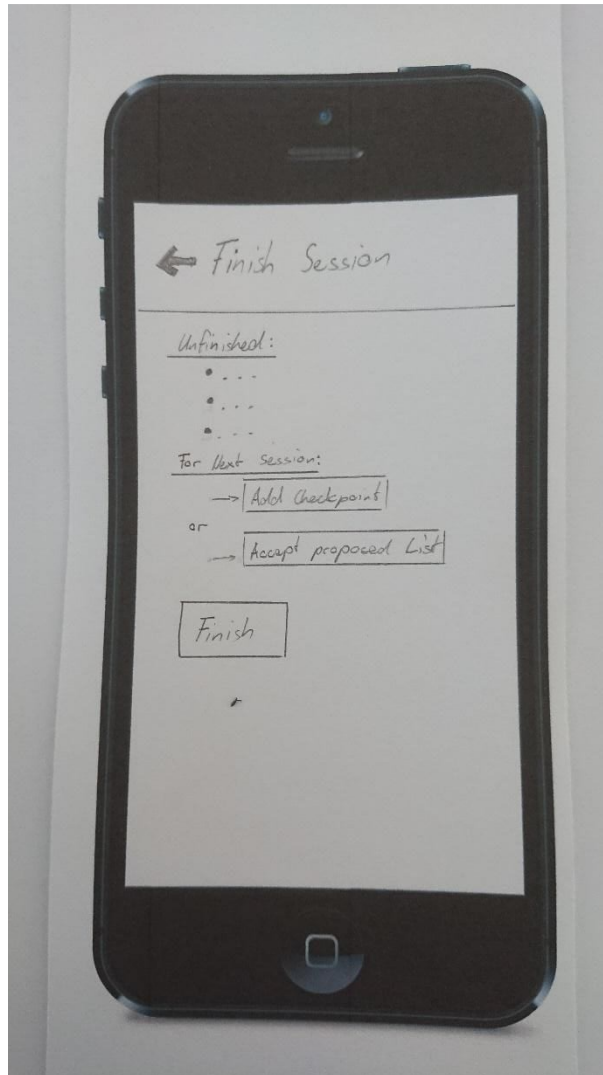

- once you finish a session you automatically create a next one
  - unfinished checkpoints are added automatically
  - create a list on what you want to work next time.
    - you can choose from the lists out of your projects or just add new ones
    - new points can also immediately be added to projects.
  - you can use lists that are proposed to you (e.g. from teacher)
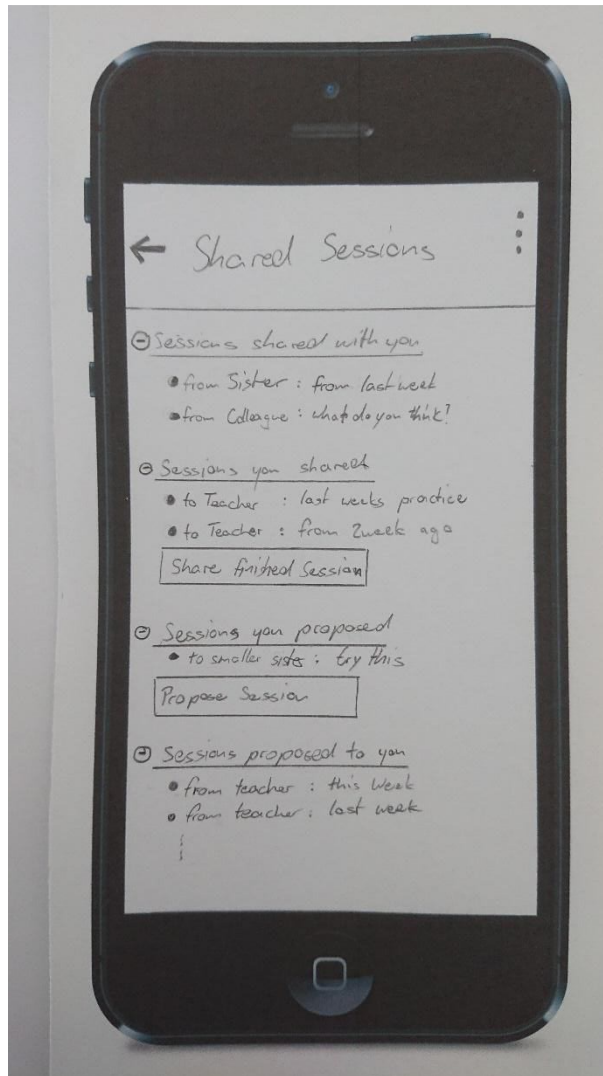

- overview of shared and proposed sessions
  - click on the + to expand
  - shared sessions can only be shown not worked on
    - you can choose if you want to show the progress on a shared session
  - propose session to someone so they can include them up in their exercise
